

**SRR & CVR GOVERNMENT DEGREE COLLEGE  
(AUTONOMOUS)  
MACHAVARAM, VIJAYAWADA-520004  
DEPARTMENT OF ZOOLOGY**

<b>Name of the Activity</b>	<b>Field visit by Aquaculture technology and Aquaculture cluster elective students</b>
<b>Place</b>	<b>ICAR Regional Fresh Water Research Institute Penamaluru</b>
<b>Date</b>	<b>21/10/2017</b>

Students were explained about the various research activities that taking place in the centre and research faculty explained about different types of hatcheries and the process of hatchery management that is in the campus. They were taken to culture ponds and explained the types of ponds maintained there.

Students were given the live from the ponds in that area and they identified the fish characters. They have taken the morphometric data of the fishes in those ponds which they used for later practical work and project work. They spend the whole day in the farms and seen the feeding management process. They collected the sample of water in different ponds for water quality parameters
